SKILLS

CLOUD & IAC

AWS · Terraform · CloudFormation · Ansible

CONTAINERS & ORCHESTRATION

Kubernetes · Docker · ECS · ECR

CI / CD

GitHub Actions · Jenkins · GitLab CI

OBSERVABILITY

Prometheus · Grafana · ELK · CloudWatch

DATABASES

MySQL · PostgreSQL · DynamoDB · ElastiCache · Neo4j

SERVERS & NETWORKING

Nginx · Apache · VPN · Load Balancers

EDUCATION

BCA in Computers & Engineering

Maharishi Arvind Institute of Science and Management · 2020

CERTIFICATION

AWS Solutions Architect – Associate

SAA-C03 · Amazon Web Services

PROFESSIONAL SUMMARY

Experienced DevOps professional with 5+ years designing, implementing, and managing complex cloud infrastructures on AWS. Proven track record owning the full DevOps lifecycle — from CI/CD pipelines and container orchestration to observability, security, and cost optimisation. AWS Solutions Architect Associate certified with deep hands-on expertise in Terraform, Kubernetes, GitHub Actions, and the ELK stack. Delivered SOC2 compliance, secured $5,000 in AWS credits, and maintained 99.9% production uptime.

PROFESSIONAL EXPERIENCE

Senior Cloud Engineer

Dec 2025 – Present

Caylent · Full-time · Remote · Irvine, California, US

- Designed CI/CD deployment approval gates using GitHub Environments — production requires manual review; dev/staging deploys remain fast.
- Enabled AWS Security Hub with CIS and FSBP standards across all environments, meeting SOC2 compliance requirements.
- Tuned CloudWatch alarms per environment to reduce false-positive pages and improve signal quality.
- Managed all infrastructure via Terraform + GitHub Actions on EKS, Lambda, Neptune/Neo4j, and RDS.

AWS · Terraform · GitHub Actions · EKS · Lambda · Neo4j · SOC2 · CloudWatch

Senior DevOps Engineer

Nov 2024 – Dec 2025

Hudle · Full-time · On-site · South Delhi, India

- Solely owned the entire DevOps lifecycle at a fast-growing sports-tech startup — CI/CD, monitoring, cost, security, and infrastructure.
- Built and maintained CI/CD pipelines with GitHub Actions and Jenkins, enabling faster and more reliable releases.
- Provisioned scalable, highly available AWS infrastructure using Terraform and CloudFormation.
- Containerised applications with Docker and Kubernetes; implemented auto-scaling and production-grade reliability.
- Designed observability stack: Prometheus, Grafana, and ELK for real-time health monitoring and bottleneck resolution.

AWS · Kubernetes · Docker · Jenkins · GitHub Actions · Terraform · Prometheus · Grafana · ELK

Senior DevOps Engineer

Jan 2024 – Jul 2024

Squareboat Solutions · Full-time · Hybrid · Gurugram, India

- Managed DevOps across multiple simultaneous projects and teams; trained the engineering team on cloud best practices.
- Deep AWS administration: EC2, S3, EBS, VPC, ELB, RDS, IAM, Route 53, CloudFront, CloudWatch.
- Authored Terraform scripts provisioning EC2, EFS, ECR, ECS, ELB, IAM roles, and S3 at scale.

AWS · Terraform · Ansible · CloudFormation · Docker

DevOps Engineer

Jul 2022 – Jan 2024

Squareboat Solutions · Full-time · Gurugram, India

- Set up and maintained logging and monitoring with Elasticsearch, Kibana, Prometheus, and Grafana.
- Managed IaC with CloudFormation, Terraform, and Ansible; orchestrated Docker containers via Kubernetes.
- Deployed Linux Kubernetes clusters; managed MySQL, DynamoDB, and ElastiCache.

Kubernetes · Docker · ELK · Prometheus · Terraform

Cloud Solutions Engineer

Mar 2021 – Jun 2022

I2K2 Networks · Full-time · Noida, India

- Managed EC2, S3, SES, and SNS; automated S3 operations via AWS CLI.
- Administered Nginx, Apache, MySQL, PHP, and MariaDB for internet-facing applications.
- Migrated workloads to AWS from multiple cloud providers; authored Terraform provisioning scripts.

AWS · Nginx · Apache · Terraform · Docker

KEY ACHIEVEMENTS

LEGENDARY

Sole DevOps — Full Lifecycle

Owned entire DevOps lifecycle solo at Hudle — CI/CD, monitoring, cost, security, and infra.

EPIC

$5,000 AWS Credits Secured

Helped client Hero Vired obtain $5,000 in free AWS credits, enabling accelerated cloud adoption.

EPIC

SOC2 Compliance Achieved

Enabled Security Hub with CIS & FSBP across all environments at Caylent.

RARE

$1,300 AWS Dispute Resolved

Successfully disputed an AWS charge, saving $1,300. Received client commendations.

RARE

99.9% Production Uptime

Maintained uptime via rolling deployments, health checks, and automated rollback pipelines.

RARE

Observability Built from Scratch

Designed Prometheus + Grafana + ELK, giving teams real-time production visibility.
